

## Raffaele Brustia

Raffaele is senior HPB and liver transplant surgeon at the Pitié Salpêtrière University Hospital of Paris, France.

His interests include patient recovery in liver transplantation including préhabilitation and rehabilitation, on which his PhD project is based; methodology of clinical research and consensus-based studies; biomedical statistics and data analysis; core set of outcomes and patient reported outcomes. He obtained an MD degree in Italy, followed by a residency in general surgery across Italy and France. His clinical fellowship was focused on HPB and liver transplantation surgery, at Saint Antoine University Hospital (Junior fellowship) and Pitié Salpêtrière University Hospital (senior fellowship), both in Paris, France.

He completed a master degree in Clinical Research at Sorbonne University; he is actually working on a pedagogic module in clinical research, and on a "hands-on" anatomic model for training in liver split.
